

Salatrillo Plant Tour

Cost: \$50

November 28, 9 a.m.-Noon

The San Antonio River Authority's (SARA) Utilities department began providing wastewater utility services in 1966 and currently operates six active permitted wastewater treatment plants with a combined capacity of over 10 million gallons per day. SARA's Utilities department strives to produce the highest quality effluent possible using beneficial microorganisms to naturally and efficiently treat the wastewater before discharging it into the creeks. Our wastewater treatment plant tour offers participants an inside look to the treatment process, the water quality monitoring lab and the discharge point. To learn more about SARA, visit <https://www.sara-tx.org/> and to learn more about SARA Utilities, check out the video here <https://www.youtube.com/watch?v=AOuVonMgEG>
