

NORTH AMERICAN PULTRUSION CONFERENCE

ROSEMONT, IL · APRIL 8 – 10, 2019

IN PARTNERSHIP WITH

AOC Aliancys

AOC Aliancys is the leading global supplier of resins, gelcoats and specialty materials for the composites industry. With strong capabilities around the world, AOC Aliancys delivers unrivaled quality, service, and reliability for today, and is creating innovative solutions for tomorrow. Visit aocaliancys.com to learn more.

AXEL Plastics Research Laboratories, Inc

Axel Plastics Research Laboratories (AXEL) is a US-based manufacturer of proprietary mold releases and process aid additives for all types of plastics, rubbers, and urethanes. We are a third generation, family-owned business located in Monroe, Connecticut.

Chromaflo Technologies is a premier global provider of colorant technology solutions, serving customers in architectural and industrial coatings as well as the thermoset composites market.

Composites One

With the use of composites growing in North America, Composites One puts you in touch with Pultrusion experts who can help guide you from product selection to process know-how...quickly and locally. And if your manufacturing team is in need of polyester, vinyl ester, epoxy, as well as carbon fiber and other knitted and hybrid reinforcements, we have that, too. Plus our technical support, local customer service, and value-added service will help you sharpen your edge and leave your competition in the dust! That's the power of Partnership. The Power of One – Composites One.

Leading manufacturer of unsaturated polyester, and vinyl ester resins, gel coats and Bonding Compounds under the CoREZYN®, and Silmar® brand names for the pultrusion and composites industries.

Jushi USA

Jushi is a leading supplier of fiberglass reinforcements and fabrics to the reinforced plastics industry worldwide.

Kent Pultrusion

Kent Pultrusion's ServoPul Machines introduce servo motor and drive technology to control pulling and clamping forces and register monitored feedback to the operating system. The ServoPul lines range from startups with lighter production specifications all the way up to today's industry standard pultruded profiles, including thin and heavy walled structural shapes. Pulling window and pulling and clamping forces can all be customized according to customer specifications. Kent also provides a full range of secondary downstream fabrication equipment, from manual or semi-automatic operations, to fully automated robotic work cells to the fenestration & Composites industries including custom cut to length sawing, routing, milling & drilling systems that improve production & increase efficiency.

PART Consulting LLC

PART Consulting are a group of experts in thermosetting chemistry and their applications in composites and other industrial applications. We have over 60 years of combine expertise in resin manufacturing, formulation development, and production scale up. Our expertise includes epoxy chemistry as well as bismaleimides, benzoxazines, polyurethanes, polyesters, and other thermosets. We help clients with complex challenges by providing solutions for their business goals and applications. No what your needs [marketing, R&D, production] come and speak to us about your needs, and how we can help you.

Romeo Engineering, Inc

Romeo Engineering Inc. is a professional engineering firm registered in the state of Texas and located in historical Fort Worth. We provide highly customized cells of automation for every sector and specialize in manufacturing high precision waterjet cutting tables and pultrusion equipment.

Technick Products

Technick Products, Inc is a leading supplier of high performance additives serving the Thermoset and Thermoplastic markets. Our additive line includes: Non-Halogenated Flame Retardants, Internal and External Process Aids and Mold Releases, Wetting and Dispersing Agents, and Green Cleaning Agents.
